

MaxFlo[®]

High Performance Filter Aids

MaxFlo Klear filter aids are designed with the customer in mind. High permeability with high particle retention and low cake density, engineered and designed to achieve the correct balance between flow rates, clarity and economics for the customers.

Natural & Renewable-using refined Rice Hull Ash Technology

Liquid Filtration of:

Fine Particles
Gels
Compactable Materials

Water / Wastewater
Sludge Dewatering

Proven & Patented, used as Precoat and/or Bodyfeed-

Increased Filtration Efficiency
High Filtration Rates
Better Filtrate Clarity

More Filtrate yield
Better Cycle Times

Grades for Fine, Medium and Coarse Filtration

GIVE US A CALL!

Let our Filtration Experts and our Filtration Lab analyze your application and develop an economical treatment system to meet your requirements.

MaxFlo[®] Rice Hull Ash Technology

MaxFlo is a highly efficient refined silicon dioxide originating from rice hull ash with certain adsorption and ion exchanging properties. It is a porous amorphous silica material produced from carefully controlled combustion. The particles are rigid, irregular shaped with “micro filter” porous structure as shown. Due to its “micro filter” structure and unique physical, chemical and surface properties, MaxFlo has been successfully used as a filter media or filter aid in numerous water and wastewater treatment applications
