

MaxFlo[®] Klear

High Performance Filter Aids

MaxFlo Klear filter aids are designed with the customer in mind. Using MaxFlo Advanced Filter Aids and adding proprietary ingredients, MaxFlo Klear is designed as a de-dusted highly permeable Filter Aid. MaxFlo Klear was originally engineered and designed to achieve the correct balance between flow rates, clarity and economics for swimming pool, spa, and water park customers. It has since been successfully used in Rotary Vacuum Precoat Filters (RVPF / RVDF), filter presses, and pressure filters in a variety of applications.

Natural & Renewable-using refined Rice Hull Ash Technology

Exceptional Clarity for Crisp, Appealing Water
Dust Controlled for better working environment

Superb Tolerance for heavy loading
Proven in large water parks and many industrial applications

Proven & Patented, used as Precoat and/or Bodyfeed-

Increased Filtration Efficiency
 High Filtration Rates
 Better Filtrate Clarity

More Filtrate yield
 Better Cycle Times

Typical Applications from MaxFlo[®] Klear

Hazmat Oil Spills
 Process and Waste Water

Pool Filtering

MaxFlo[®] Rice Hull Ash Technology

MaxFlo is a highly efficient refined silicon dioxide originating from rice hull ash with certain adsorption and ion exchanging properties. It is a porous amorphous silica material produced from carefully controlled combustion. The particles are rigid, irregular shaped with “micro filter” porous structure as shown. Due to its “micro filter” structure and unique physical, chemical and surface properties, MaxFlo has been successfully used as a filter media or filter aid in numerous water and wastewater treatment applications
